LogiGear   TestArchitect
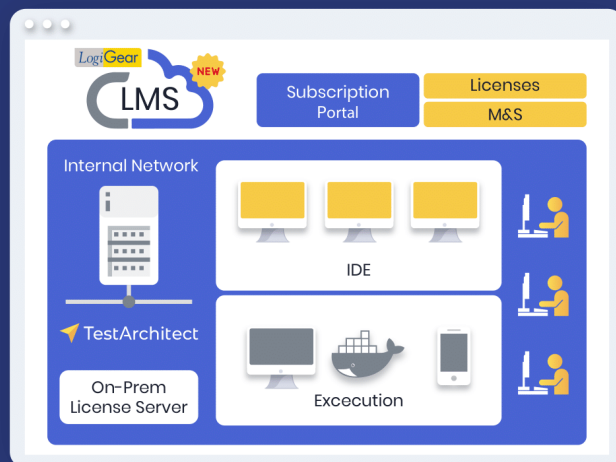

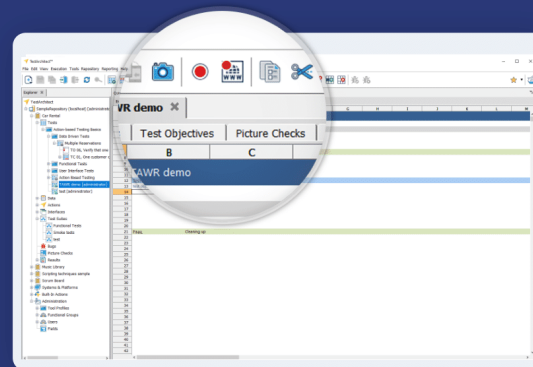

TESTARCHITECT VERSION 9.0
NOW AVAILABLE!

In 2021, LogiGear is helping companies transition to a cloud-first mindset, and TestArchitect is evolving to meet such new expectations that go along with it. The new SaaS-based License Management Service will enable TestArchitect customers to manage their QA and their cost more effectively. Check out these powerful new features below!

CLOUD-BASED LICENSE MANAGEMENT SERVICE (LMS)

LogiGear has deployed its brand new License Management Service to the cloud. This SaaS-based service will help LogiGear customers to conveniently manage their software licenses and their cost with greater flexibility and availability.
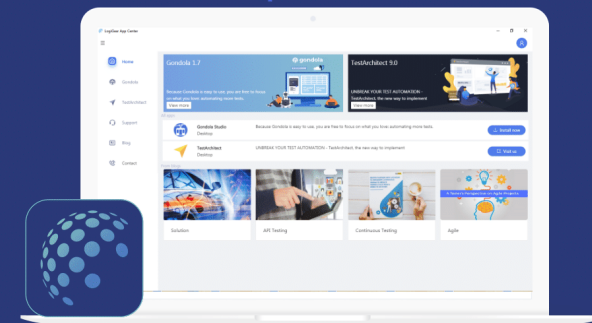

TESTARCHITECT WEB RECORDER

With TestArchitect Web Recorder, Automation engineers speed up their test creation process significantly by recording the manual interactions with their web apps and automatically generating Automation scripts.
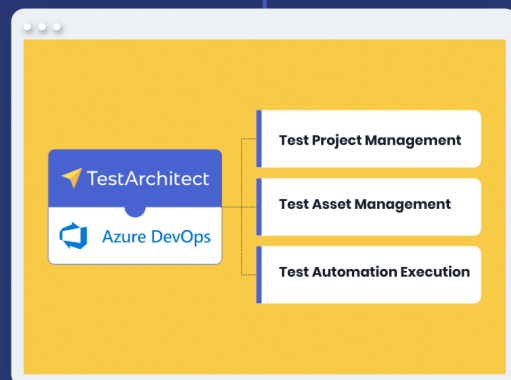

LOGIGEAR APP CENTER

LogiGear also took this opportunity to release its new App Center on which users can access the latest LogiGear software including TestArchitect Enterprise, TestArchitect Gondola, and other LogiGear products. Check out the new **LogiGear App Center here!**

AZURE DEVOPS SERVICES (ADO) INTEGRATION

Customers who are currently using Microsoft Azure DevOps Services (cloud-based) can now integrate their work processes with TestArchitect to efficiently manage their automated tests, trigger TestArchitect Automation runs, and upload TestArchitect results back to ADO via REST API.

Test Project Management

Test Asset Management

Test Automation Execution

Try TestArchitect Version 9 Today!

This new version of TestArchitect features major improvements that help LogiGear's enterprise customers move fast in their DevOps and Digital Transformation journey, and it is now available for download.
