Contents

Please note:
- Before upgrading to the latest version of TestArchitect, it is strongly recommended that you back up all repositories.
- A TestArchitect client and any repository server to which it connects must be of the same version.

What's New in TestArchitect 8.2 Update 3

The following new features and improvements are introduced in the latest version of TestArchitect running under Linux.

TestArchitect Client

Enhancements to existing features

- Performance improvement during startup of the Repository Server.

TestArchitect Automation

- **Built-in actions/built-in setting to handle unpredicted appearance of a modal dialog box in desktop applications:** The troublesome modal dialog can be automatically closed, or custom-handled by a user-defined action**.**
    - **on modal action** (built-in action): Specify the action to be invoked in the event of the occurrence of a modal dialog box that may block the test automation.
    - **get modal definition** (built-in action): Retrieve the definition of the current modal dialog box.
    - **modal close attempts** (built-in setting): Set the number of retries for the invoked action handler specified in the **on modal action** built-in action.

System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

Recommended system requirements

	TestArchitect Client/Controller with small-scale Repository Server	Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)
Operating system	Red Hat Linux 5.8 and 6.3	Windows 2008/2012 Server
RAM	4 GB	8 GB
HDD	At least 2.5GB available space	Available space of at least 2 GB plus total aggregate size of all databases
CPU	2 GHz dual-core or faster	3.1 GHz quad-core
