What's New in TestArchitect 8.2 Update 3	3
TestArchitect Automation	3
System Requirements	4
Recommended system requirements	4
Additional Resources	4

Please note:

- Before upgrading to the latest version of TestArchitect, it is strongly recommended that you back up all repositories.
- A TestArchitect client and any repository server to which it connects must be of the same version.

What's New in TestArchitect 8.2 Update 3

The following new features and improvements are introduced in the latest version of TestArchitect running under OS X.

TestArchitect Automation

- **Mobile testing**
 - **Support for mobile apps testing on iOS 9.x.**
 - **Beta support for web automation on Safari running on iOS simulator, available within Xcode.**
 - Introduction of cloud testing: TestArchitect now allows for testing web applications on Safari on iOS cloud devices by means of cloud computing services.

System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

Recommended system requirements

	TestArchitect Client/Controller with small-scale Repository Server	Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)
Operating system	MAC OS X 10.8 (Mountain Lion) or above	Windows 2008/2012 Server
RAM	4 GB	8 GB
HDD	At least 2.5GB available space	Available space of at least 2 GB plus total aggregate size of all databases
CPU	2 GHz dual-core or faster	3.1 GHz quad-core
