**Please note:**

- Before upgrading to the latest version of TestArchitect, it is strongly recommended that you back up all repositories.
- A TestArchitect client and any repository server to which it connects must be the same version.

# What's New in TestArchitect 8.4 Update 1

The following new features and improvements are introduced in the latest version of TestArchitect running on Linux.

## TestArchitect Client

### Enhancements to existing features

- The length limit of a [test step's title](#) has been increased from 70 characters up to 30,000 characters. This improvement allows you to create more meaningful and descriptive titles.

## System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

### Recommended system requirements

	TestArchitect Client/Controller with small-scale Repository Server	Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)
<b>Operating system</b>	Red Hat 7.2, 6.6, 6.3 ( <a href="#">Learn more</a> )	Windows 2008/2012 Server
<b>RAM</b>	4 GB	8 GB
<b>HDD</b>	At least 2.5GB available space	Available space of at least 2 GB plus total aggregate size of all databases
<b>CPU</b>	2 GHz dual-core or faster	3.1 GHz quad-core
