What's New in License Server 9.0

The following new features and improvements are introduced in the latest version of License Server running on Linux.

License Server

Enhancements

- **A new generation of License Server** - This new version of License Server helps you conveniently manage your licenses using a LogiGear account. Most importantly, you can move your License Server instances from one machine to another machine anytime without the need to contact LogiGear Sales staff.
 - **Note:**
 - License Server 9.0 requires internet connection to communicate with License Management Service hosted by LogiGear on clouds.
 - TestArchitect 9.0 requires License Server 9.0. If you upgrade to TestArchitect Client version 9.0, you will also need to upgrade your License Server to 9.0.
